

# Case 1: Integrating NIS2 Compliance into OT/IT Platform for a leading Energy firm

## Background

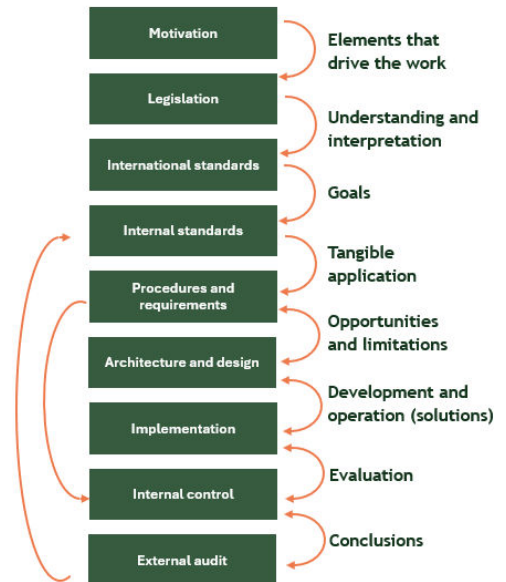

One of the **largest energy companies in Denmark** was facing increased **cyber-attack threats due to geopolitical changes**, while also aiming to **transition to green energy** in response to changing energy supply needs and **dealing with the complexity of the legal requirements**. They wanted to **map and track down the compliance decisions** made and design an implementation plan for the final platform.

### What we did?

### How?

Traceability map to navigate complexities:

## Business Impact:

Oversight on key KPIs

120 employees trained in GRC

Lowered the overall risk by one level

Enabled better compliance through standards and certifications
